PROFESSIONAL SUMMARY

Computer Science and Engineering graduate focused on Full Stack Web Development, with hands-on experience building database-driven web applications using Python, Flask, SQL, MongoDB, HTML, CSS, JavaScript, React and Node. Experienced in developing RESTful APIs, authentication systems, role-based access control, CRUD operations, database relationships, web scraping, and modular backend applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend: Python, Flask, Node.js, REST APIs, JWT Authentication, bcrypt, Middleware
Database: MongoDB, MySQL, PostgreSQL / SQLAlchemy
Tools: Git, GitHub, Postman, Vite, MongoDB Compass, VS Code, Neon

PROJECTS

Maintenance Management System

Python | Flask | PostgreSQL | SQLAlchemy | HTML | CSS | JavaScript

- Developed a role-based maintenance management web application to manage maintenance requests, technician assignments, and request status tracking.
- Implemented user authentication and role-based authorization for USER, TECHNICIAN, and ADMIN access levels.
- Designed and integrated relational database models for users, maintenance requests, assignments, and status history using PostgreSQL and SQLAlchemy.
- Built Flask routes using a modular Blueprint-based architecture and implemented authentication middleware to protect authorized resources.
- Implemented maintenance request CRUD operations, status updates, technician assignment, and status history tracking.
- Connected the Flask application with a PostgreSQL database hosted on Neon and managed application configuration using environment variables.

FULL STACK NOTES APPLICATION | REACT.JS, NODE.JS, EXPRESS.JS, MYSQL

- Developed a full-stack Notes Management Application using React.js, Node.js, Express.js, and MySQL with complete CRUD functionality.
 - Implemented JWT-based authentication and bcrypt password hashing to secure user registration and login.
 - Designed and integrated RESTful APIs using Express.js and MySQL2 with input validation, CORS configuration, and structured backend routing.
 - Built a responsive React frontend using React Hooks, Axios, React Router, and Tailwind CSS for creating, viewing, updating, and deleting notes.
 - Implemented frontend-backend integration and database operations with reusable components, validation, and error handling.
- Technologies: React.js, Node.js, Express.js, MySQL, JWT, bcrypt, Axios, Tailwind CSS, Git

PROFESSIONAL EXPERIENCE

OPERATIONS ANALYST

CMS Info Systems Pvt Ltd, Pallavaram | Sep 2024 – Aug 2026

- Managed end-to-end incident and service requests across 5 states, coordinating field teams and ensuring timely resolution within SLA.
- Provided remote technical support and coordinated software updates, system validation, diagnostics, and service restoration
- Handled escalations from vendors, clients, and internal teams, ensuring effective communication, follow-up, and ticket closure.
- Coordinated spare replacement and logistics operations, tracking requests from initiation through delivery, replacement, verification, and final closure.
- Tools - CMS Internal CRM, Zoho OTP platform, ATM Monitoring System.

EDUCATION

B.E. – COMPUTER SCIENCE AND ENGINEERING

Arunai Engineering College, Tiruvannamalai | 2020 – 2024 | CGPA: 8.4/10

CERTIFICATIONS

- Full Stack Web Development
- Web Development Certification
